

Urban water and sanitation challenges in low-income countries

Dr Martin Mulenga, Senior Researcher, International Institute for Environment and Development

Date: Wednesday 13 February 2013

Time: 2:00pm – 3:00pm

Venue: Building 58 / Room 1025

This talk will focus on one of the themes of the Global South Forum, which is the Millennium Development Goals, specifically, Millennium Development Goal 7 (Ensure Environmental Sustainability).

The speaker is experienced in this area of work and is presently working with partner organisations in Angola, Argentina, Ghana, India and Pakistan to document locally developed innovative and creative solutions to water supply and sanitation in low-income urban neighbourhoods.

This GSF presentation is free of charge and is open to all undergraduate and postgraduate researchers as well as members of staff. Following the presentation, there will be an opportunity to talk to Dr Mulenga about his work and some of the issues that will be raised in the presentation.

Dr Martin Mulenga

About the speaker

Dr Mulenga studied his PhD at the University of Southampton in Civil and Environmental Engineering. He is presently a Senior Researcher for the Human Settlements Group at the International Institute for Environment and Development. His area of expertise is water and sanitation services in low income urban settlements.

Supported by the Centre for Citizenship and Governance (c2g2) and the Centre for Global Health Population, Poverty and Policy (GHP3)
